Subject: GIA HongKong Fancy Cut Research (April 7 to April 16)

This year GIA needs some help again as they work toward a grading system for various fancy shapes.
GIA Research will be conducting observations of real diamonds (emerald cut, pear, oval, and marquise) at GIA Hong Kong Laboratory from **April 7th to April 16th, 2014**.
GIA could use YOUR eyes to tell us what you like and don't like. You will look at several samples of these shapes and provide feedback as to which ones you prefer. It will take about 40 minutes. Can you help?
This is only by appointment and we will greatly appreciate your participation.
We welcome multiple volunteers from the same company!
To make an appointment, please contact Carman Lee at 3166-7089 or email for an appointment at kalee@gia.edu

We value your feedback and look forward to your participation!

Best regards.
Carman Lee
